Jayne is the best
Very insightful day
Good course
Fantastic seminar
overall again a fabulous day. very well thought out and structured. patient feedback is fabulous to hear as always.
Really informative day. Very interesting and thought provoking.
Very well organised. Relevant interesting topics. Good pace and structured breaks. Opportunities for discussion.
Very elaborate informative and educational course
Conference organised very well, with really interesting presentations and discussions.
Great
N/a
it would be good to have not rate some talks as did not attend them all, or want to rate my own !
Outstanding conference, very well organised and all speakers well prepared. Everything ran very smoothly.
I found the day very informative and educational, loner breaks for lunch would have been appreciated as the day was packed and not long for lunch given.
Excellent work! Keep it up, please.
please could we have recordings
Very good course
Talks on the overview of ovarian cancer and palliative care was fantastic. I also really enjoyed hearing about the patient's experiences
Well organised event, thank you!
Mazing session on ovarian cancer, very insightful
Very good and well done. Great to see excellent trainees and med students
n/a
A very well organised and informative symposium. Thank you very much

It would have been interesting to have more discussion around the results of the audit, and to here experiences/ opinions from attendees who work in cancer centres vs cancer units.
an excellent update on ovarian cancer - all relevant and interesting talks
extremely interesting day - would like hard copy of presentations to re-enforce knowledge
Excellent day as always thank you
very interesting
Well organised, excellent day
An extremely informative and educational day! Thank you very much!
Very interesting sessions
Very interesting and informative meeting. I find virtual meetings are more tiring on the eyes...too much screen. I hope the meetings will revert to attending when possible. Having said that I found the meeting very good. thank you
Genuinely really impressed with the breath of topics - quality of presentations / speakers / audits. Really enjoyed the day. Appreciated the webinar forum as easily accessible- thank you
Great learning event
Excellent presentations
Rich presentations - but great as well = thank you all
Good study day
As always, the symposium has been beneficial with latest information and updates about gyn oncology. Enjoyed it thoroughly
Excellent programme
Enjoyed the introduction to ovarian cancer, was a good overview of all of the factors that come together to diagnose/treat the patient. The radiological talk was great but having little understanding of this topic myself I found it a little hard to follow (without a pointer to see the specific areas that were being talked about). Unfortunately Dr Hawari's presentation got cut a bit short towards the end – would have liked to have heard more of this, very informative and well explained. Patient experience videos really put things into perspective, it's good to hear this side of things and how what we do impacts the patient – such strong ladies. Again the imaging in the thorax talk was really interesting but with limited knowledge myself, would have been better if anatomical landmarks could have been pointed out and areas of interest. The surgical videos/pictures were great to see!
Very well organised and excellent presentations
Well organised, good presentations

Very informative session
Scored 3 for all talks I was unable to attend due to clinical commitments. Attended the afternoon session as part of deanery teaching. Palliative care talk was very structured and useful.
Great day again
Thank you for a very useful symposium
Excellent course
Thanks very much!
very interesting symposium
Thank you
awesome lectures, updating my knowledge. Many thanks.
Great day, we need it at least twice a year
Excellent presentations and concise/relevant information delivered. Well organised and throughtfully enjoyable. Thank you very much!
Excellent Symposium. Very educational and interesting. Learned a lot!!! Thank you for organising this.
None
Well organised with interesting engaging speakers
Very interesting study day but felt very intense as some sessions were rushed and back to back with minimal break times (could lead to lose focus as a result).
well thought out programme, excellent presenters
Excellent course, thanks for arranging.
Good day, Found histology talk a bit hard going.
This was a fabulous course. The content was presented exceptionally well. I found it extremely useful
I am Deanery trainee and joined as approved during the TLH presentations. My best part was the use of video and images in the teaching about reducing disease in the thorax. Good audiovisual display.
Thank you
No comments
a fantastic meeting, an interesting and informative update on ovarian cancer and a great opportunity to meet (virtually)

with other members of the multidisciplinary team and learn about wider developments within the field of ovarian cancer
Enjoyed the histology and imaging presentations
An extremely informative and educational day! Thank you very much!
Well planned, very informative presentations
I thought Mr. Hawari's talk was particularly interesting and certainly gave a new perspective on what is achievable at the time of ultra-radical debulking surgery. The other thing that really came through from the patient feedback part of the symposium was the severity of symptoms associated with a surgically induced menopause, this is certainly something that I will counsel the patients more rigorously on when I consent them for theatre. I thought the organisation of the whole day was fantastic! Already looking forward to the next one!
Excellent symposium, I thoroughly enjoyed all the presentations and learnt quite a lot about ovarian cancer.
A thoroughly enjoyable and informative educational event. Planned out really well, very relevant topics. Cannot recommend these seminars/webinars highly enough!! A huge thank you to the organising team and to all the speaker for putting together such a good quality educational event.
It was an excellent event. Thank you.
Very useful day,great speakers and the difficult topic of ovarian cancer was made simple and covered extensively. Look forward to future symposiums,thank you for the opportunity
I have attended these symposiums for several years and have found them extremely informative with new information every time. It is so reassuring to hear there are new developments in the pipeline for women encountering this type of cancer. It also makes me very proud to be just a small part of the Derby team as we lead the way in our clinical excellence. The patient experiences are always a tear-jerker as I remember them all very well and feel extremely humbled to have played a small part in their care. Keep up the good work team and thanks for another informative day.
For my own level of knowledge / experience the Imaging presentation would have benefited from visual identification of areas of concern on the imaging. I appreciate this may not be relevant to all attending the symposium.
Very well organised thorough session on ovarian cancer! Well done to everyone!
An excellent informative symposium delivered by clearly knowledgeable and passionate experts.
Very information and useful symposium with latest clinical evidence.
Thanks for a fantastic day of education, all of the talks were very interesting and highly applicable to practice.
Some excellent presentations, Thank you very much for another successful symposium. I particularly liked Samantha Crockett's presentation, what a mind field (genetics). As a Gynae Pre assessment nurse, I found the patient experience to be very interesting. During my clinics I find a lot of oncology patients feel that their journey was very quick, and not all the information given by the consultant or Macmillan CNS's is absorbed at the time of being told of their diagnosis. Knock on effects in pre assessments often cause delays in the clinic because naturally we want the patient to fully be aware of their

<p>journey. Once again. Thank you to Dr Suzi Addley and Mr Summi Abdul.</p>
<p>.</p>
<p>Really enjoyed all the presentations I've seen today. All have been up to date and thought provoking. Well done to all those involved. Well organised and good selection of speakers. The presentations not scored were only not scored as I was called into clinic. I'm hoping to catch these once the recording is available. Good planning to record the talks. Perfect for those that couldn't commit to the whole day.</p>
<p>Really interesting and informative day, lots of great presentations thank you very much to all presenters and organisers. Look forward to next year's Cervical symposium.</p>
<p>I am the admin support for the Gynae CNS team at ULHT, so quite a lot of this was over my head. But there was a lot of interesting and useful information that will help me in my role. I have to leave at 15.45</p>
<p>excellent, thank you. Dr Clamp - far too deep for the majority of the audience unfortunately, sorry. Had to leave at 4pm, sorry.</p>
<p>Fantastic course – really informative and I feel like I've learnt a lot! Histopathology section – Really good, it was just a lot of information which was gone through quite quickly (for me). Thoracic section – Surgical images/videos were really interesting and well explained.</p>
<p>Very useful and informative day, thank you for organising and delivering</p>
<p>Clear overview by Suzi Addley with lots more details to follow from multiple great speakers. As a GP I was grateful to have been invited to the day and enjoyed having the in depth information. Thank you for having me.</p>
<p>High standard of presentations throughout the day, a really good update with the majority relevant / interesting for the general Gynaecologist.</p>
<p>Dr Addley's ovarian cancer overview was particularly beneficial to someone like myself who is not medically trained, but does have an understanding of the diagnosis – it was well-explained and easy to follow. As I was working on the day of the symposium I had to dip in and out a bit, but I think that's the fantastic thing about the symposium being held virtually. It means that people like myself can still "attend" even if we aren't able to stay for the whole event.</p>
<p>As always, the symposium was a great success and well-pitched for a wide audience. I found the Palliative care session very interesting but would have liked this to be earlier in the day as my concentration had gone by the end of the day. It was a shame that the cursor on the radiology session did not work. Saying that, coming from a nurses background I was able to follow this session well and was able to pick up a lot of things on the scans that I would normally not have.</p>
<p>OVERALL EXCELLENT AND MANY THANKS FOR ALL YOUR EFFORTS.</p>
<p>Very enjoyable day. Learn a lot.</p>
<p>Many thanks for organising such an informative and interesting day.</p>
<p>Brilliantly organised symposium. Thanks to Dr Addley for securing such superb speakers and for the fantastic introductions</p>

to all of them. Well done to all the trainee presenters and the Delta research group. A good team effort from all involved.
Was really good day. Very informative and well organised. Thank you
Always well run, interesting and engaging content. I always learn something I can take in to practice. Already looking forward to next year.
A brilliant day of diverse talks that covered a wide breadth of information. Well organised and presented.
Attending The Gynaecological Symposium was relevant to job role. From the day I have learnt and gained further, updated knowledge and insight as to how much Gynaecology Cancer care is improving. All the speakers are very knowledgeable in this field and presented information related to the day. I particularly enjoyed listening to the Trainee and Delta Research Presentations; I felt they were really interesting. I also enjoyed meeting other members of the team at Derby, listening to their specialised roles and recognising extent of their work they do. I feel The Gynaecological Symposium has greatly improved my knowledge and understanding of Gynaecological Cancer and will look forward to attending the future event.
.
Well organised, very good knowledge it was all relevant to the current practice
.
Very nice and informative symposium. I hoped to find a talk about benign ovarian cysts and its management (would be relevant to General Gynaecologists as being more common). Great effort and organisation by Mr Abdul and Miss Addley (5 out of 5).
<ul style="list-style-type: none"> • It is a delight to have a knowledge update in gynae cancer every year. Many thanks.
Very informative as always. Thank you
Excellent selection of topics and speakers. Very well organised.
Very nice presentations, thank you for the opportunity
<ul style="list-style-type: none"> • Thank you so much for a very educational day. All the speakers were truly engaging and the update has been invaluable. I look forward to the next event.
Excellent update with great speakers. Thoroughly enjoyed the day and found it very useful even though I am a benign gynaecologist.
Very informative sessions
Really informative session thank you
This was a fantastic meeting. It was very well-chaired and kept to time. All the sessions were well-presented, thorough and useful, and all the speakers were clear. Excellent - well done to all involved.
S Addy - Excellent presentation and very informative. R Hawari - As always a fantastic presentation.

Good and informative Symposium to attendf
Great course, thanks
Registration easy and very quick response and link sent straight away early morning. Thank you. Very good topics. Excellent organisation , well organised topics and catered to all levels of trainees . Good presentations and looking forward in the future for future presentations and updates Thank you for this opportunity to involve the trainees at the symposium . A great learning platform .and excellent discussions. Extensive discussion and good time keeping and organisation. Looking forward for future sessions.
Very interesting and informative presentation by Dr Addley, easy to understand and very knowledgeable. Always interesting to listen to Dr Hawari, she is so passionate and makes a complicated topic easier to understand, also very interesting slides! It was a fantastic presentation she could have been given more time as it felt a little rushed at the end! Informative data from Ovarian cancer audit. Very thorough data from Dr McMullan. It's always nice to hear from patients and about their experiences. Really informative genetics session. Very in depth session regarding oncological challenges- I have to admit being a surgical CNS much of this I didn't really understand! Very interesting session though especially regarding PARP inhibitors and immunotherapy as this is being used so much more. Enjoyed the session by Mr Hawari, as working in Nottingham the patients he was discussing were our Gynae onc patients, very interesting and the videos/images were amazing!
Good job, interesting talks. thank you
Thanks for a very informative day
Excellent meeting, well organised. Quite comprehensive, good learning opportunity. Thank you, look forward to the next year
excellent coverage with knowledgeable presenters.
Great day of fantastic speakers. I have learnt so much. Thank you to all involved.
It was all absolutely excellent. Unfortunately I had to participate from my office whilst overseeing the dept so got interrupted multiple times, - but I hope I had watch some segments again. Also, despite initially being able to see the presentations, for some reason I lost the first presentation slides and had to shut down the computer but thereon it was fine. I absolutely loved the patient experience. I would like to encourage other sonographers to watch the sessions when they are available. Thanks for an excellent annual resource which never fails to be intriguing.
The course was incredibly interesting and really useful.
This is the second symposium that I have attended. I found both of them so beneficial. All of the sessions were excellent – I have learned so much from them all. The speakers were all so enthusiastic. A really well organised day and the range of topics covered was excellent. I shall be recommending this to staff at our Trust for next year. Well done Derby. Great work
The conference was well organised.
Brilliant Symposium, very informative and well organised. Keep up the hard work

Very interesting symposium. Unfortunately, it is virtual. Hopefully next year it will be face to face.

I am a GP and did find large part of the symposium relevant to my practice. Some parts like elaborate description of operation procedure and radiological description were not much relevant to primary care. Though I appreciate these would have been relevant and educative to other members of the audience from different speciality. My ratings above is based on relevance of talk to my work.

Excellent Day, Well organise by Jayne. Suzie did a fantastic job sorting programme

it was good learning opportunity

I found the whole day very informative, relevant and interesting. Many thanks for all the hard work putting the day on.
