Comments

We would appreciate any comments on what you enjoyed and areas for improvement and/or suggested changes for the course: -

We were made very welcome by the faculty and Jayne. Well organised course, good communication from Jayne pre-course arrangements. Faculty very helpful and made us feel comfortable in theatres. I felt that I learnt a lot, improved my skills and got a foundation to build up my skills on.

Excellent team, brilliant coach and mentor- will strongly recommend to trainees and colleagues.

Exciting hands on workshop. Very useful and thoroughly enjoyable. Mr Abdul and Mr Amer were excellent. Jayne was very approachable and very efficient. The course was very well organised and theatre staff were excellent. Will be very happy to recommend the course to colleagues.

Could you introduce a session on the different ultrasound/electrical kits bearing in mind that delegates will be coming from hospitals that already have equipment (which may differ from yours).

Excellent workshop. The suturing practice sessions were very helpful. By the end of Day 2, I was fairly confident in suturing and tying knots. All the faculty members were excellent. Jayne was very supportive, helpful and made me feel very comfortable. Enjoyed the course dinner on Day 1. Very thankful and appreciate it. Would recommend the course to my colleagues. The hands on theatre sessions were very good. Learnt to use VCare. Appreciate the support and patience of Mr Amer, Mr Abdul and the theatre team. Thank you very much.

Very practical course – hands on by every delegate – fantastic.

Excellent course. Delivers exactly what the delegate wants. Very enthusiastic teachers. Hands on experience was brilliant. It's commendable that the consultants training the delegates have so much confidence to let us operate on cases. Could not ask for more. Thank you.

As a medical student this course gave me a unique opportunity to experience being in such a professional environment and practice activities otherwise not practised at medical school. Those activities included: practicing lap suturing, practicing trocar insertion, practicing using some surgical equipment such as harmonic scalpel and morselator, being taught the process of TLH in detail and shown it being done multiple times and assisting in TLH – a unique opportunity at this stage of my medical journey. Overall, the course is an amazing experience and an opportunity to gain new skills.

I really admire your entire team! This is the best hands on course I have attended.

Jayne – superb support all round, all the little things that you have done e.g. tea/coffee/biscuits/lockers/theatre shoes and more importantly, you made me feel so welcome and at ease!

Mr Summi Abdul – You are an exceptional educator, leader, trainer and most kind and generous with your teaching and sharing your expertise. I really like the way you make TLH look so simple! I can't thank you enough for letting us operate with you! What a privilege. I want to be you one day – operate and teach with ease.

Mr Saad Amer – Thank you for the very interesting facts/figures about TLH and the history too. Excellent explanation of Thunderbeat and Harmonic principle. I really enjoyed operating with you.

THANK YOU FOR TAKING THE TIME TO COMPLETE THIS FORM
