	Intra-uterine adhesions – management strategies – Justin Clark	8	1	1		
	Tips and tricks in operative hysteroscopy – Ertan Saridogan	9	10	1		

Comments

We would appreciate any comments on what you enjoyed and areas for improvement and/or suggested changes for the course: -

Very good hands on sessions and some excellent presentations.

It would be nice to have the printout of the talk or a snap shop if possible.

Very informative and interactive.

The microphone was a bit on and off as were the projector connection. Things also ran over a lot, though thankfully it is very flexible so if you needed to leave because it was late, that was ok.

Very interesting and thought provoking. Very good group and close knit. Wonderful Q&A sessions both fun and interesting. Good venue to ask our burning questions. Surprisingly no –one seems to be here for CPD points only – mere knowledge sharing session from lion's den.

The workshops were very good but I think less time set for these would have been better as there was a lot of waiting around.

I liked Dr Metwally and Prof Grudzinskas' comments.

Well organised.

Suggest work shop PM rather than AM. Well organised. Very informative

Struggled to follow session 'For HSG' as multiple comments "I'll come to that later" but didn't. Felt uncomfortable for young med student who appeared to be being victimised/picked on. Speakers initial placement obscured view of screen. Some slides difficult to view.

The course could be 1.5 days. The workshops can be during lunch hour or end of day. The best thing about the course is lectures and discussions.

Day 2	5	4	3	2	1
Adenomyosis treated surgically to enhance fertility For – Stephan Gordts	8	11			
Against – Enda McVeigh	9	7			
Endometriosis surgery for infertility – tips and tricks - Antoine Watrelot	10	7	1		
Endometriomas and ART: to operate or not to operate – Saad Amer	11	7	1		
The role of Robot in Reproductive surgery – Gourab Misra	6	9	3	1	
Uterine transplantation – an update - Mats Brannstrom	18	2			
Fertility preserving surgery in cancer patients - Summi Abdul	16	4			
Addressing fertility issues in disorders of sexual development - Ephra Yasmin	4	2	2		
Abstract presentation	8	6			
Use of ovarian tissue cryopreservation in clinical practice - Christian Becker	16	3			
Ovarian tissue cryopreservation for cancer to benign reasons – Erik Ernst	10	4			
Counselling for women undergoing cryopreservation case presentation – Pip Reilly	6	6	6		
Intramural fibroids of ≥5cm should be removed : For – Yacoub Khalaf	9	6			
Against –Abha Maheshwari	7	5	1		
Closing Remarks - Kamal Ojha and Ertan Saridogan	6	1			

Comments

We would appreciate any comments on what you enjoyed and areas for improvement and/or suggested changes for the course: -

Poor acoustics and mikes did not work very well. The course was otherwise excellent with the range of topics/hands on.
Christian Becker – very informative and educational. Mats Brannstrom – Excellent. It would also be helpful to have some sessions including the nurses.

Interesting debate about fibroids and other topics.

Mats Brannstrom – Brilliant. Thing ran over again. It's been a very enjoyable conference, and friendly to discuss and network.

Very heated discussion. Awesome meeting.

Debates were excellent.

Very informative.

Everything was so good and very beneficial. Organised.

All talks very interesting even though not all relevant to my area of practise.

Fabulous sessions from uterine transplant and tissue cryopreservation team.

THANK YOU FOR TAKING THE TIME TO COMPLETE THIS FORM
